EXPERIENCE

Electrika Ltd — *Lead UX Designer, Product Manager*
2015 - Present

OneTime - Product Information Management Web App

Responsible for research, design and project management to design a market-leading PIM system for the manufacturing sector. I am currently leading a team of two full stack developers and two data analysts using sprints and the agile methodology to build powerful data import, management and export tools. I run the daily stand ups and weekly sprint meetings.

Schneider Electric - Estimating Software iPad and Web App

Responsible for research, design and project management to redesign the Schneider Electrics outdated estimating system. I led a team of three full stack developers on a year-long project using sprints and the the agile methodology to deliver a better experience for sales engineers on both iPad and the web. I ran the daily stand ups, weekly sprint meetings and stakeholder milestone meetings.

British Gas - Site Survey iPad and Web App

Responsible for research and design of a site survey tool for British Gas engineers. The tool was designed to reduce callouts to unprofitable on-site visits by asking customers to complete a simple survey and provide supporting images to allow sales engineers to pre-qualify jobs.

Electrika - Product Search Web App

Responsible for research, design and project management to redesign an outdated web app for looking up product information for electrical estimating. I led a team of three full stack developers on a six-month project using kanban and the agile methodology to deliver a better overall experience, especially on mobile, and improved SEO. We increased website traffic by 1,233%. I ran the daily stand ups, weekly sprint meetings.

SKILLS

Visual Design

Design System Creation

Interaction Design

Card Sorting

Wireframing

Prototyping

User Research

Empanty Maps

Information Architecture

UX Leadership

Team Leading

Scrum Master

Angular (basic)

AWARDS

Professional Diploma in UX Design - UX Design Institute (In progress)

Business Management NVQ Level 2 - JP Training

Unitrunk - Product Website Web App

Responsible for research, design and project management to redesign an outdated website for one of our clients. Myself, and a full stack developer using kanban and the agile methodology, created a simple product website for Unitrunk to pull data from the OneTime API.

Wenso Ltd — *Head of UX Design, Product Manager*
2013 - 2014

Four Magazine - Content Management System Web App

Responsible for research, design and project management of a bespoke content management system/enterprise resource planning tool for a print publishing company. I oversaw an outsourced development team based in India using the agile methodology.

B Lucky Casino Hire — *Head of UX Design, Owner*
2009 - 2013

B Lucky - Website

Responsible for research, design and project management of a simple brochure website for online event booking for my casino themed events company. I worked closely with an outside consultant to complete the coding using the agile methodology.

B Lucky - Events

Responsible for the research, design, planning, and hosting of over 800 themed events. Event management is comparable to UX design, as you must understand the client's requirements, plan the flow of events and measure success.

EDUCATION

UX Design Institute — *Professional Diploma in UX Design*
2019 - 2019

JP Training — *Business Management NVQ Level 2*
